

LAUNCHING APRIL 2019

New Range

Ducted & Cassette

Reverse Cycle Air Conditions

Key Features:

7 Years Manufacturers Warranty

DC Inverter Technology - ensures the stable operation of the compressor and will save power, compared to standard air conditioners.

IW Standby - energy saving when the system is under standby operation.

Electronic Expansion Values - can satisfy various temperature demands across multiple indoor units, saving a great deal of energy whilst providing comfort.

Wide Ambient Operation Range - reliability for the extreme climates around Australia. (Heating -10 to 24 degrees; Cooling -15 to 48 degrees)

Winter Function - In our colder winter climates, maintain the room temperature steadily with our 8 degree feature; when the room temperature drops below 8 degrees, the system will switch on and keep the room temperature at 8 degrees. Preventing freezing of household items; even when you are not home.

Functionality - Compatible with most controllers on the market and our system will come with a standard controller.

Optional Controller - The TECO Smart Building Management Controller, for commercial applications whereby one wired wall controller, can directly control 16 indoor units in the network, without an extra communication module.
